Introduction

The GNSH Token is inspired by a strong passion for creating games and platforms and driving for blockchain revolutionary change. It is the portal to a world of freedom and opportunity. The many prospects of the GNSH token cut across several industries, and the token is still in the early stages of its journey. It is why right now is the best time to get involved. The GNSH token is not just another token. It is aimed at creating wealth and adding value for all its holders. Ownership affords the holder access to the massive GNSH community and the several platforms based on the token. We also focus on making games and monetize all of our projects upcoming. The short-term and long-term plans for the GNSH token and the entire ecosystem are radical and uncommon. These characteristics help it stand out among other tokens that might be related. These plans will be highlighted in the roadmap of the GNSH token. Early bird investors stand to make huge profits if they get in early enough. The projected growth and proliferation of the GNSH coin will translate to an exponential increase in their investments' value (significantly when they invest for the long term).

THE ROADMAP (Old One)

See the new roadmap on webpage. This is the old one. The purpose of the GNSH token is to facilitate real-world changes while building games and platforms. The ticket will serve as the starting point for several projects that will add value to people and profoundly transform their activities. The GNSH token will stand out for many of its real-world applications.

The journey ahead looks like a lot of growth and expansion. We have many plans to share with you.

These are the goals that we look to accomplish in the nearest future. Some of them include:

Community

Community building is at the very heart of the GNSH project. It fosters communities that will play a chief role in our activities in both the short and long terms. We will rally efforts and leverage the internet to build a mammoth virtual community. It is one of the areas that will receive maximum attention once the token kicks off.

We won't stop there; after successfully building a virtual community for our users, we will build real-world community centers.

These community centers will be places where all our GNSH users will be able to call their homes. They will be a result of all users' collaborative efforts, which will help to grow a more profound sense of community as the project develops.

GaneshaSwap

We are already setting the foundation elements for building a token swapping platform. The name of the platform is GaneshaSwap.

It will allow for GNSH users to swap their tokens for other similarly themed tokens.

Fun Stuff

There is so much in store for you in the coming weeks. We are hyping the GNSH token on a massive scale online and even offline. We will disrupt the entire crypto ecosystem with the gospel of the GNSH token.

You should know that you also have a role to play in promoting every GNSH token content on your platforms.

We plan to blow the GNSH token to the moon with our noise on the internet. We will leverage social media channels to propagate the word. On telegram, we will create two channels. One of these channels will be a playing ground for whiners while the other will be for winners.

Once these two channels have kicked-off and are in full effect, we will enforce specific regulations. These regulations will help protect and maintain civil and friendly communication within the drain and allow members to interact with one another freely. Our channels will also be used to disseminate essential information. After these ground rules have been enforced, we will move to the primary mission of the project. In other words, we will dive full-throttle into our many projects that are aimed at effecting real-world changes. Updates on upcoming projects and the status of current projects will be shared in our channels. Promotional materials, memos, special offers, bounties, and so on

will also be sent to the channels so that every member has access to up-to-date information.

Merchant Platform

We are also working on a robust merchant platform that will be exclusive to our users. The platform will be available for every GNSH holder. On this platform, users will be able to buy and their products and services. The GNSH token will play a crucial role as the currency that facilitates these activities.

On the one hand, users (sellers) who have products or services will list their products on the GNSH Merchant Platform. These sellers will be allowed to receive payments in GNSH tokens.

On the other hand, users (buyers) who browse through the listings and find products or services they want will be able to buy directly on the platform. These buyers will be allowed to make payments in GNSH tokens.

NFT Trophies

NFT trophies will be introduced as a critical part of the Ganesha ecosystem. These tokens will significantly boost GNSH staking. They will be called the 'Legendary Trophy Items,' and they will be nine in total. The benefits of the NFT trophy items will transcend beyond boosting GNSH staking alone; they will cross into several other areas.

USE CASES

Trading

The GNSH token will be listed on the most popular exchanges in the crypto world. Some of these exchanges are uniswap, pancakeswap, and 1inch. The process is already underway and will be completed shortly.

Once the GNSH token has been listed on these platforms, users will trade their other tokens for the GNSH tokens. As a result, the GNSH token value will increase at a faster rate than it already is.

Users will also be able to trade their GNSH tokens for other tokens.

Listing

Holders of the GNSH token will be able to transact using the token. Users who have products or services for sale will be able to list them within the GNSH ecosystem.

Buyers who will be able to check through listings will be able to buy any product or service of their choice. These sellers will receive payment in GNSH tokens.

INVESTORS

Our investors (especially our early bird investors) will always be at the heart of our operations. As we are still in our preliminary stages, we offer our investors

a tremendous opportunity to grow the value of their assets in a short period. Early bird investors will have the highest margins of returns because their investments will experience an exponential increase in value as the GNSH token grows. The successful launch of the token to the public, the massive hype that will follow, and the promising items on the roadmap will all work together to multiply all investments' value. We encourage all our investors to adopt a long-term mindset when investing in the GNSH token. The long-term mindset is where the real profit is. So, we recommend holding tokens for as long as possible after purchase. Holding a significant volume of GNSH tokens will translate to having immense bargaining power when the GNSH ecosystem is completed.

We are offering early bird investors a chance to get in on the action by allowing them to buy a big slice of the monopoly that will ensure. While investments are more than welcome, we also recommend that every investor is genuinely interested in the mission and plans of the GNSH token. That way, besides from the enormous profits investors will make, they will also get a sense of purpose and fulfillment from knowing that they have been able to effect real change in the world.

All the above might get changed a lot. We are working out our roadmap progressively.
